7. In *Civil Law* (=L. *servitus*), and hence in *Scots Law*: a subjection or subserviency of property either: (1) to some definite person other than its owner ('personal servitude'), or (2) to some definite property other than that of its owner for the benefit of the dominant property ('prædial servitude'). In *Scots Law* the term is now in practice restricted to prædial servitude, which includes both the 'easement' and the 'profit à prendre' of English Law; it has been sometimes used by English lawyers to include both these kinds of rights.

A personal servitude (of which usufruct is an example) could be constituted either over movables or immovables; a prædial servitude (e.g. a right of way) could only be constituted over an immovable in favour of another immovable.

b. **Sessions of the peace** (in ordinary language simply **sessions**): the periodical sittings of justices of the peace (or, in some instances, of a stipendiary magistrate or a recorder). Often const. as *sing.*

In England the sessions of the peace are of the following kinds: *petty sessions*, a court held by two or more justices or a stipendiary magistrate, exercising summary jurisdiction in minor offences within a particular district (a 'petty sessional division'); *special sessions*, a periodical meeting of the justices of a division prescribed by statute for the transaction of some particular kind of business (under this head are included *brewster* or *licensing sessions*, for the hearing of applications for licences to sell alcoholic drinks'); *general* or *quarter sessions*, a court held four times a year (in a county, riding, etc. by the justices of the peace, and in certain boroughs by the recorder), having a limited criminal and civil jurisdiction and certain administrative functions. (*The sessions*, without qualification, usually denotes the quarter sessions.) Quarter sessions are also held in Scotland and Ireland. In certain British colonies the English system of sessions of the peace formerly existed, and was for a time retained in some of the United States.

Confusion between *set* and *sit* arose as early as the beginning of the 14th c., owing partly to the identity or close similarity of the forms of their past tenses and pa. pples., and partly to the identity of meaning in some uses, as between *to be set* (= seated) and *to sit*; cf. SIT *v.* (etym. note and A. 5 a *a* note). For cases of mere substitution of forms of *sit* for forms of *set*, see A. 1 γ, 2 δ below. B. Signification.

General arrangement of senses. I. To cause to sit, seat; to be seated, sit. II. To sink, descend. III. To put in a definite place (the manner of the action being implied either in the verb itself or in the context). IV. To place or cause to be in a position, condition, relation, or connexion. (This group embraces a large number of uses in which the precise implication of sense depends mainly on the kind of construction employed.) V. To appoint, prescribe, ordain, establish. VI. To arrange, fix, adjust. VII. To place mentally, suppose, estimate. VIII. To put or come into a settled position or condition. IX. To put in the way of following a course, cause to take a certain direction. X. Senses perhaps arising from reversal of construction or from ellipsis (their origin being often obscure). XI. With prepositions in specialized senses. XII. With adverbs in specialized senses. (Combinations formed on the verb-stem are given in a separate article, SET-.) ☞ A phrase key is given on page 548.

I. To cause to sit, seat; to be seated, sit.

The intransitive sense 'to sit' (15) was apparently developed out of the reflexive and passive uses of the original transitive sense of 'to seat'. *Set*, being thus used synonymously with *sit*, became capable of taking its other senses and constructions (see 5 d, e, 6, 7).

1. *trans.* To place in a sitting posture; to cause to occupy a seat; to seat.

This sense is barely exemplified outside certain phraseological expressions, e.g. *to set on a seat, a throne, on horseback*, etc., in which the sense 'cause to sit' is now lost sight of. (Prov. *to set a beggar on horseback*: to give an undeserving person an advantage which he will misuse.)

SEVERAL—SHASTER.

BY

HENRY BRADLEY, HON. M.A., PH.D., F.B.A.

NOTE.

THIS section (72 pages) includes 636 Main words, 211 Special Combinations explained under these, and 340 Subordinate entries: in all 1187. The *obvious combinations* recorded and illustrated number 227, making a total of 1414. Of the Main words 122 (19 %) are marked † as obsolete, and 30 (4¾ %) are marked ‖ as alien or not fully naturalized.

Comparison with Dr. Johnson's and some recent Dictionaries gives the following figures:—

	Johnson.	Cassell's 'Encyclopædic'.*	'Century' Dict.*	Funk's 'Standard'.	Here.
Words recorded *Several* to *Shaster*	110	500	725	576	1414
Words illustrated by quotations	83	180	245	64	1151
Number of illustrative quotations	461	342	753	96	8736

* Including Supplement.

The number of quotations in the corresponding portion of Richardson is 341.

The section consists of two parts, markedly different in etymological character. The first fourteen pages contain hardly any words that are not of Latin or Romanic origin, the only important survival from Old English being the verb *sew*. The words beginning with SH, which occupy four-fifths of the space, are in overwhelming proportion Teutonic. Direct Latin derivatives, for an obvious reason, do not occur at all, and of adoptions from French there are only two or three. The Celtic element is represented by *shamrock* and two or three Gaelic words adopted in Scottish dialects. There are a few Oriental words, of which only *shah* and *shampoo* are in general use. The longest article in the section is that on the verb *shall* (and its past tense *should*) which extends to six pages. Although the treatment of this verb is far from being exhaustive, it is hoped that the examples collected may contribute materially to a clearer understanding of the development of its meaning and uses. Other words of interesting sense-history are *severe*, *sex*, *shade* and *shadow* (sbs. and vbs.), *shaft*, *shake* sb. and vb., *sham*, *shame*, *shank*, *shape* sb. and vb., *share* sb. and vb., *sharp*. The interpretation here given to Shakspere's *shard-borne* is not new, but has received little countenance from the Commentators. The evidence afforded by the history of *shard* sb.[2] and sb.[4], and by the Shaksperian examples quoted under *shard* sb.[2] and *sharded*[2], seems, however, to be decisive in its favour. Among the articles which contain etymological facts or discussions not found in earlier dictionaries are *sew* vb., *sewer* sb.[1], *shackle*, *shanty*, *shape* vb., *shark* sb.[1] and sb.[2]

The remaining words with initial SH will occupy a double section, which will be issued on April 1, 1914. Contemporaneously with that section a Part will be issued, extending from *Sea-egg* to the end of SH. This will complete Vol. VIII.

2. An artificial channel or conduit, now usually covered and underground, for carrying off and discharging waste water and the refuse from houses and towns. *Common sewer*: a drain through which all or a large part of the sewage of a town passes, a main drain collecting and discharging the contents of auxiliary drains. Cf. SHORE *sb.*[2]

The development of this sense (*c* 1600) is prob. due to the fact that the drainage of towns near tidal rivers had come under the control of the commissioners of sewers. See Act 3 Jas. I, c. 14 (1606).

Technically, 'sewer' is distinguished from 'drain', the latter being restricted to channels used 'for the Drainage of one Building only or Premises within the same Curtilage' (Act. 11 & 12 Vict. c. 112 § 147).

The term 'Commission of Sewers' (AF. *Commission de Sewerez, de Sewers*) occurs first in 1427 (Rolls of Parl. IV. 333/1 and Act 6 Hen. V, c. 5), but the issue of similar commissions is recorded in 1314 (Rolls of Parl. I. 319/1) and in 1322 (Placit. Abbrev. 339/1).

[*Note.*—In the collocations 'Commission of sewers', 'works of sewers', etc., the word had virtually a much wider meaning than sense 1 above; it practically denotes any means of defence against inundation from the sea. The formula enumerating the things placed under the control of the commissioners begins with 'walls' (1322 more fully 'sea-walls', *murorum maritimorum*) and mentions 'sewers' only in the fifth or sixth place. This had already attracted the attention of lawyers early in the 17th c.; in 1622 Callis (*Stat. Sewers*, ed. 1647, p. 57) states that 'some compound the word of *sea* and *were*' (=WEIR, defence). Although sense 1 is certainly genuine, and the etymology stated at the head of this article is well established, it seems not impossible that there may have been some early confusion with a native compound of the formation suggested by the writers referred to by Callis. No instance of OE. **sǽ-wer*, however, is known; a (?plural) *sǽ-wére*, of obscure meaning, occurs A.D. 1045 (Kemble *Cod. Dipl.* No. 776): 'Se iggað æt portes bricge & healfe sæ-wære & se mylnstede æt Mannes bricge.' The Anglo-Latin derived verb *sewerare* (1314 in *Rolls of Parlt.* I. 319/1) appears to mean 'to protect from flood'.

The pseudo-etymological spelling *seward* (quot. 1623 in 3) is noteworthy. Skinner (Etymol. 1671, s. v.) erroneously attributes to Minsheu the statement that the word 'was formerly written *seward*, perhaps from *seaward*, either because they [*sc.* sewers] are made towards the sea, or because they ward off the sea'.]

SH, a consonantal digraph representing the simple sound (ʃ). In late OE. this sound was represented by the combination *sc*, which retained its original phonetic value (sk) only in words of foreign origin. The sound (ʃ) did not exist in early OF., and hence the early ME. texts, written by French-educated scribes, show great diversity of attempts to find expression for it. The OE. notation by *sc* became rare after the 12th c. Some scribes of the 12–13th c. used the single *s* initially and finally. More frequent was *ss* (used in all positions), which is found as late as 1340 (*Ayenbite*). In medial and final positions *ssh* was common from the 13th to the 16th c.; Coverdale (1535) has frequently *szsh*, sometimes *szh* (but also often *sh*). The prevailing form from the end of the 12th c. to the end of the 14th c. was *sch* (initially; in other positions it was less frequent); in the north it was common down to the end of the 16th c. In the 13th c. we occasionally find *sge, sȝe, sze* for *she* (rarely *sȝ* or *sz* in other words), and in the 14–15th c. some East Anglian scribes wrote *xal, xulde* for *shall, should*. In ME. texts the suffix *-ship* is often written *-chipe*, and sometimes *ch* occurs as the symbol of (ʃ) in other positions.

The combination *sh* (probably to be regarded as a simplification of *sch*) is regularly used in the *Ormulum* *c* 1200 and frequently in the *Trinity College Homilies* of about the same date. It is the usual symbol in the London documents of the 14th c. and in the MSS. of Chaucer, and from the time of Caxton onwards it has been the established notation for (ʃ) in all words except those which (as *machine, schedule, Asia*, the derivatives in *-tion*, etc.) are spelt unphonetically on etymological grounds.

In some compounds as *dishonest, mishap, Gateshead, s* and *h* come together without forming a digraph. The pronunciation of some proper names in which this sequence occurs has been affected by misinterpretation of the spelling; e.g. Evesham is often called (ī·vʃăm), Petersham (pī·təʃăm).

Sh (ʃ), *int.* Also written **'sh** (as if an abbrev. of *hush*). An exclamation used to enjoin silence or noiselessness; = HUSH *int.* The reduplication or prolongation of the sound is indicated by *sh-sh, s-s-sh*, and the like (see quots.).

b. *Shadow of death*: a Biblical expression (= LXX and N.T. *σκιὰ θανάτου*, Vulg. *umbra mortis*) embodying an ancient interpretation of Heb. צַלְמָוֶת, traditionally vocalized *ṣalmāveth*, as if f. *ṣēl* shadow + *māveth* death.

Ewald and many other scholars, however, think the word should be pronounced *ṣalmuth* (or as pl. *ṣalmōth* = Arab. *ṣalamāt*), and that it comes from the Semitic root found in Arab. as ظلم *ẓalima* to be dark. However this may be, it is in the Old Testament merely a poetic word for intense darkness (so the margin of the Revised Version, 'deep darkness'). But the phrase 'shadow of death' has (in Eng. as in Christian Latin and other langs.) often been used with various meanings naturally suggested by the words; the commonest use is to denote the gloom and horror of approaching dissolution.

The valley of the shadow of death (Ps. xxiii. 4 in Eng. versions from Coverdale 1535; the earlier versions follow the Vulg. and LXX, which read 'midst' instead of 'valley'): often applied to the experience of being brought by illness apparently near to the grave.

The Land of the Shadow of Death: a rhetorical name for a tract of Western Africa in which the mortality among the white inhabitants is very great.

Shaft (ʃaft), *sb.*[3] Also 5 **shafte**. [Corresponds in sense to MHG. *schaft*, mod.G. *schacht* masc., which is prob. a. LG. *schacht* (also Du.) of the same meaning, usually regarded as a specific application of *schacht* = Shaft *sb.*[2], the primitive notion being that of something cylindrical. It is possible, however, that the type **skafto-* represented by LG. *schacht*, Eng. *shaft* 'pit-hole', may be a separate formation on the Teut. root **skaf-* of Shave *v.*, in its original sense to dig (cf. Gr. σκάπτειν). On either of these views, it is doubtful whether *shaft* 'pit-hole' goes back to OE. (though not recorded before the 15th c.), or was introduced into England by foreign miners.

Some scholars still adhere to the view of Grimm, that the HG. *schacht* (and LG. *schacht* in this sense) represent a Teut. type **skafto-z*. On this supposition the Eng. word would necessarily be a loan word from the continent. Grimm's hypothesis is formally possible, but leaves the ultimate etymology obscure, as the suggested connexion with the root **skak-* Shake *v.* is semasiologically improbable.]

Shale (ʃēl), *sb.*[2] [Perh. a use of SHALE *sb.*[1], or a derivative of SHALE *v.* (sense 5).

There is no sufficient reason for the common view that it is a. G. *schale* (=SHALE *sb.*[1]), which is not used in this sense (the G. equivalent being *schieferthon* 'slate clay'); *schale* however occurs for a thin layer of ore or stone, and the *Deutsches Wbuch.* has *schalstein* a laminated limestone, *schalgebirge*, explained as 'a layer of stone in a stratified range of mountains'.]

Shall (ʃæl), *sb.* [f. SHALL *v.*]

1. An utterance of the word 'shall'; a command, promise, or determination (such as is expressed by means of 'shall').

It is doubtful whether quots. 1553 and 1608 belong to this word or to SHALE *sb.*¹ Quots. 1566 and 1593 imply the existence of a punning phrase *to feed* or *serve with shalls* (*shales*).

1553 *Respublica* (Brandl) III. iii. 90 *Adul.* Ye shall prove att length by theffecte yᵗ shall ensue. *Peop.* Nai, and we shall alwaie bee serued but with shales, than chil beleve een still yᵗ vaire woordes beeth but tales. 1566 ASCHAM *Let.* in Harington *Nugæ Antiq.* (1804) I. 101 As now another man shall enjoye the sweet kirnell of this hard and chardgeable nutt, which I have bene so long in cracking; and nothing left unto me but shells and shalls to feed me with all. 1593 CHURCHYARD *Challenge* 153 Y 2, You shall haue Nuts, they say when ploms are ripe. ARNOLD *St. Paul & Protestantism* (1875) 85 The external *shalls* and *shall nots* of the law.

2. The word 'shall' as idiomatically used in contradistinction to 'will'.

1837 MACAULAY *Ess., Bacon* (1843) II. 408 Not one Londoner in a million ever misplaces his *will* and *shall*. 1861 Jos. ANGUS *Handbk. Engl. Shall (ʃæl, *unstressed* ʃəl, ʃ'l). Pa. t. **should** (ʃud, ʃəd). Forms: see below. [A Com. Teut. preterite-present strong verb: OE. *sceal, sculon, sc(e)olde* = OFris. *skil* (*skel, scol*), *skilun* (*skalun*, etc.), *skolde* (*sculde*, etc.), OS. *skal, skulun, skolda*, OLow Frankish *sal, sulum, solde* (MDu. *sal, sullen, solde*, mod.Du. *zal, zullen, zou*), OHG. *scal, sculun, scolta*, also *sal* (*sol*), *sulun, solta* (MHG. *schal* and *schol, schulen, scholte*, also *sal* and *sol, sulen, solte*; mod.G. *soll, sollen, sollte*), ON. *skal, skulu, skylda* (Sw. *skall*, pa. t. *skulle*; Da. *skal*, pa.t. *skulde*), Goth. *skal, skulum, skulda*. The Teut. root (**skel-*:) **skal-* : **skul-* to owe (:—pre-Teut. **skel-* : **skol-* : **skˈl*) is represented by Goth. *skula*, OHG., OS. *scolo*, OE. *gescola* wk. masc., debtor, OHG. *sculd, sculda* (mod.G. *schuld*), OS. *sculd*, OE. *scyld* fem., debt, guilt. Outside Teut. the only certain cognates are Lith. *skelˈti* to be guilty, *skilti* to get into debt, *skolà* debt, guilt, OPrussian *skallisnan* (acc.) duty, *skellânts* guilty, *po-skulit* to admonish.

The northern English dialects (including Sc.) have a form *sal*, pa. t. *suld*, with initial *s* instead of *sh*. This does not occur in the remains of ONorthumbrian, but first appears in the 13th c. It is remarkable that a similar form, with *s* irregularly representing OTeut. *sk*, existed as a dialectal variant in OHG. (*sal, sol, sulun*) and OFris. (*sal, sel*), and has ousted the regular form in Ger. (*soll, sollen*) and Du. (*zal, zou*). Some scholars regard the *s* form as representing an OTeut. variant, originating from the euphonic dropping of *k* in inflexional forms like the subjunctive **skli-*. It seems more probable that it was independently developed in the different dialects at an early period, while the *sk*- retained its original pronunciation; in stressless position the *k* might naturally be dropped, and the simplified initial afterwards extended by analogy to the stressed use.

In Eng. the vb. has no inf. or pples. (the evidence of an OE. inf. *sculan, sceolan*, is doubtful). Some of the other Teut. langs. have an infinitive: OHG. *scolan, solan* (MHG., mod.G. *sollen*), MDu. *sullen* (Du. *zullen*), ON. *skulu* (pa. t. inf. *skyldu*); Goth. has the pres. pple. *skulands* and the pa. pple. *skuld-s*; OHG. has the pres. pple. *scolanti* (mod.G. *sollend*), and early mod.G. the pa. pple. *gesollt*; ON. has a ppl. adj. *skyld-r* bound by duty.]

8. As a mere auxiliary, forming (with present infinitive) the future, and (with perfect infinitive) the future perfect tense.

In OE. the notion of the future tense was ordinarily expressed by the present tense. To prevent ambiguity, *wile* (will) was not unfrequently used as a future auxiliary, sometimes retaining no trace of its original sense. On the other hand, *sceal* (shall) even when rendering a Latin future, can hardly be said to have been ever a mere tense-sign in OE.; it always expressed something of its original notion of obligation or necessity. In ME. the present early ceased to be commonly employed in futural sense, and the future was expressed by either *shall* or *will*, the former being much more common. The usage as to the choice between the two auxiliaries has varied from time to time; since the middle of the 17th c. the general rule (subject to various exceptions) has been that mere futurity is expressed in the first person by *shall*, in the second and third by *will*. In indirectly reported speech, usage permits either the retention of the auxiliary used by the original speaker or the substitution of that which is appropriate to the point of view of the person reporting.

a. In OE. *sceal*, while retaining its primary sense, served as a tense-sign in announcing a future event as fated or divinely decreed. Hence *shall* has

always been the auxiliary used, in all persons, for prophetic or oracular announcements of the future, and for solemn assertions of the certainty of a future event.

b. In the first person, *shall* has, from the early ME. period, been the normal auxiliary for expressing mere futurity, without any adventitious notion. (*a*) Of events conceived as independent of the speaker's volition. (To use *will* in these cases is now a mark of Scottish, Irish, provincial, or extra-British idiom.)

(*b*) Of voluntary action or its intended result. Here *I* (*we*) *shall* is always admissible exc. where the notion of a present (as distinguished from a previous) decision or consent is to be expressed (in which case *will* must be used). Further, *I shall* often expresses a determination insisted on in spite of opposition, and *I shall not* (colloq. *I shan't*) a peremptory refusal.

In the 16th c. and earlier, *I shall* often occurs where *I will* would now be used.

c. In the second person, *shall* as a mere future auxiliary appears never to have been usual in affirmative or negative senses (exc. in the uses treated under 9 a and 11); but in categorical questions it is normal: e. g. '*Shall* you miss your train? I am afraid you will.'

d. In the third person. *Obs.* (superseded by *will*) exc. when another's statement or expectation respecting himself is reported in the third person, e. g. 'He says he shall not have time to write.' (Even in this case *will* is still not uncommon, but in some contexts leads to ambiguity; it is therefore preferable to use *he shall* as the indirect rendering of *I shall.*)

9. In the idiomatic use of the future to denote what ordinarily or occasionally occurs under specified conditions, *shall* was formerly the usual auxiliary. In the second and third persons, this is now somewhat formal or rhetorical; ordinary language substitutes *will* or *may*. Often in antithetic statements coupled by an adversative conjunction or by *and* with adversative force.

10. In hypothetical, relative, and temporal clauses denoting a future contingency, the future auxiliary is *shall* for all persons alike. (Where no ambiguity results, however, the present tense is commonly used for the future, and the perfect for the future-perfect; the use of *shall*, when not required for clearness, is apt to sound pedantic.)

† Formerly sometimes used to express the sense of a present subjunctive.

e. In statements of a former likelihood, unlikelihood, expectation, hope, fear, etc.

In present usage the rules for the choice of the auxiliary are the same as apply to the future tense (see 8). Until the middle of the 19th c., however, *should* was common in this use in the second and third persons, where *would* is now normal.

15. Forming with the inf. a substitute for the pa. t. indic. (The perf. inf. was often substituted for the pres. inf. merely in order to express the notion of past time more unambiguously. *Obs.* exc. *dial.*

The corresponding use of *shall* (= G. *soll*, 'is said to') is not evidenced in Eng., the OE. instances alleged by Bosw.-Toller having apparently a different meaning.

*** *The past tense* should *with modal function.*

As with other auxiliaries, the pa. t. (orig. subjunctive) of *shall* is often used to express, not a reference to past time, but a modal qualification of the notion expressed by the present tense. Where in addition the notion of past time is to be expressed, this can often be effected by the use of the perf. instead of the pres. inf. (though sometimes this produces ambiguity); the temporal notion may however be merely contextually implied, and in that case the pa. t. has the appearance of having both functions (temporal and modal) at once.

18. In statements of duty, obligation, or propriety (originally, as applicable to hypothetical conditions not regarded as real).

This conditional form of expression was from an early period substituted for the unconditional *shall* in sense 2, and in mod. Eng. the pres. tense in this use is obs., and *should* = ought to.

b. When the pres. tense of the principal vb. would be used if the hypothesis were accepted. (Where the pa. t. or the perf. would be used, *should* is followed by the perf. inf.)

In this use the combination of *should* with inf. forms a periphrastic past subjunctive: thus 'I should be' = the archaic 'I were'. Similarly with perf. inf.: 'Then I should have been' = 'then had I been'.

The choice between *should* and *would* follows the same rules as that between *shall* and *will* as future auxiliaries, except that *should* must sometimes be avoided on account of liability to be misinterpreted as = 'ought to' (sense 18). In present Eng. *should* occurs mainly in the first person; in the other persons it follows the rule for *shall* in 8 c, d.

c. With verbs of liking, preference, etc., *should* in the first person (and interrogatively in the second) is regarded as more correct than *would*, though this is often used.

In the third person *should* is used only in indirect speech (when *he* represents *I*); uses like quot. 1862 are abnormal.

The forms *I should have liked to (see)* and *I should like to have (seen)* are alternative ways of adding the temporal notion to the modal sense of *should*. Another form, sometimes met with, but certainly faulty, is *I should have liked to have (seen)*.

1779 Boswell *Johnson* (1904) II. 308 Should you not like to see Dublin, Sir? 1785 Trusler *Mod. erroneous use. 1883 L. Oliphant *Altiora Peto* I. 8, I should much preferred to have seen you there.

d. The original conditional notion is obscured in the phrases *It should seem* (see Seem *v.* 7 f); *one should think* (now somewhat *arch.* and perh. sometimes interpreted in the sense of 18). Similarly *I should think* (*suppose*, etc.) = 'I am inclined to think (suppose, etc.)'; also *colloq.* as a strong affirmation in reply to a tentative suggestion, e. g. 'I should (rather) think he *did* object'.

In the last phrase (as used idiomatically), *would* is never substituted; in the second person the phrase is used only in questions, and in the third person only in oblique narration.

Commonly explained as in some way connected with *sham*, north. dial. form of SHAME *sb.* and *v.* This is not impossible, on the supposition that the slang word arose from some once well-known anecdote or incident in a play. The following quot. may possibly contain a genuine tradition, but the alleged origin does not seem to account satisfactorily for the sense in the early examples.
